

ROAD SAFETY POLICY.

For TRANSPORTES A. MARTÍN, S.L.U, Health and safety during work are part of its own nature, and therefore he keeps high interest and commitment in preventing accidents and incidents in the transport activity and also in any other related activity that involves movements and/or usage of vehicles by its own employees, interested parts and other road users.

For this reason, any activity of transport in a public road should be performed in a way to avoid with the highest probability risk situations that could affect people, equipment and facilities.

In this way the Senior management express their commitment to:

- Establish and organize promotion and prevention activities in order to avoid public road accidents.
- Meet all the current regulations and traffic and road safety, paying special attention to:
 - Strict compliance with the speed limitations established based on the road and traffic conditions.
 - Usage of mobile phones and/or electronic devices that could distract from driving prohibition.
 - Strict compliance with current regulations regarding driving and rest times applicable to our activity.
- Establish awareness strategies for its workers through training and guidance for the prevention of traffic accidents and that allow the adoption of preventive behaviors in driving.
- Establish specific targets in terms of road safety, and develop strategic plans for compliance..
- Develop and implement comprehensive training programs in road safety that improve the performance of all the people involved, including, among others, the concepts of preventive driving necessary to improve that performance.
- Allocate the necessary financial, technical and human resources for the good development and continuous improvement of the road safety strategic plan, and for the fulfillment of the targets in the matter.

These lines of action will be developed and carried out through the planning, action and control of our activity carried out through our Management System, being endorsed by the highest standards in the matter (ISO Standards, SQAS, BBS ...).

D. Federico Martín Sancho
General Manager
